

“ESTURIÓN DE SARRIÓN_

Esturion de Sarrión is the first (and so far only) fish farm in Europe that raises sturgeons in running water in ideal natural conditions without using antibiotics, hormones, etc. The caviar is extracted by massaging the belly of the fish. River waters, food and technology give this black caviar a naturally unique flavor, which makes it occupy a place of honor on the tables of true gourmets and connoisseurs of black caviar.
